

We Claim:

1. A method for the treatment of dry eye resulting from injury to corneal nerves, said method comprising administering to a patient in need thereof a therapeutically effective amount of a composition comprising at least one compound that promotes neuron regeneration or neurite outgrowth.
2. The method of claim 1, wherein the injury to corneal nerves results from surgery.
3. The method of claim 2, wherein the surgery is LASIK surgery.
4. The method of claim 1, wherein the compound may be selected from the group consisting of propentofylline, AIT-082 (neotrofin), idebenone, ONO-2506, CB-1093, NS521 (1-(1-butyl)-4-(2-oxo-1-benzimidazole) piperidine, eliprodil, SR57746A (xaliproden hydrochloride) or pharmaceutically acceptable analogs thereof.
5. The method of claim 4, wherein the compound is AIT-082.
6. The method of claim 4, wherein the compound is eliprodil.
7. A method for the treatment of decrease in cornea sensitivity resulting from injury to corneal nerves, said method comprising administering to a patient in need thereof a therapeutically effective amount of at least one composition comprising a compound that promotes neuron regeneration or neurite outgrowth.
8. The method of claim 7, wherein the injury to corneal nerves results from surgery.
9. The method of claim 8, wherein the surgery is LASIK surgery.
10. The method of claim 7, wherein the compound may be selected from the group consisting of propentofylline, AIT-082 (neotrofin), idebenone, ONO-2506, CB-1093, NS521 (1-(1-butyl)-4-(2-oxo-1-benzimidazole) piperidine, eliprodil, SR57746A (xaliproden hydrochloride) or pharmaceutically acceptable analogs thereof.

11. The method of claim 10, wherein the compound is AIT-082.

12. The method of claim 10, wherein the compound is eliprodil.

5

13. A method for the treatment of injury to corneal nerves comprising administering to a patient in need thereof a therapeutically effective amount of a composition comprising a compound that promotes neuron regeneration or neurite outgrowth.

10

14. The method of claim 13, wherein the injury to corneal nerves results from surgery.

15. The method of claim 14, wherein the surgery is LASIK surgery.

15

16. The method of claim 13, wherein the compound may be selected from the group consisting of propentofylline, AIT-082 (neotrofin), idebenone, ONO-2506, CB-1093, NS521 (1-(1-butyl)-4-(2-oxo-1-benzimidazole) piperidine, eliprodil, SR57746A (xaliproden hydrochloride) or pharmaceutically acceptable analogs thereof.

17. The method of claim 16, wherein the compound is AIT-082.

20

18. The method of claim 16, wherein the compound is eliprodil.
